

WHAT IS CLAIMED IS:

1. A nail ejector, comprising:

a main body; and

a nail magazine mounted on an end of the main body.

5 2. The nail ejector in accordance with claim 1, further comprising a mounting seat mounted on the main body, and a connecting sleeve mounted on an end of the nail magazine, wherein the connecting sleeve has an end rotatably mounted on the mounting seat.

 3. The nail ejector in accordance with claim 1, further comprising a shaft, a connecting sleeve, a guide tube, and an elastic plate, wherein:

10

the main body has an end provided with a mounting seat;

the shaft is mounted in the main body and has a distal end protruded outward from the mounting seat;

the connecting sleeve has an end rotatably mounted on the mounting seat and has an inside formed with a receiving chamber;

15

the guide tube is movably mounted in the receiving chamber of the connecting sleeve and has an end secured on the nail magazine;

the guide tube of the nail magazine is formed with a shaft hole; and

the shaft is movably mounted in the shaft hole of the guide tube.
